SUMMARY

B.Tech Computer Science Engineering student currently in the 2nd year with a strong interest in software development and web technologies. Hands-on experience with C, C++, Python, HTML, CSS, and JavaScript, along with academic knowledge of Object-Oriented Programming and problem solving. Developed practical projects including a personal portfolio website and solution-oriented projects such as an Emergency Medicine Finder and Pathology Detector. Interested in software development internships and opportunities to apply programming and problem-solving skills to real-world applications.

EDUCATION

G.H. Raisoni International Skill Tech University, Pune

Bachelor of Technology (B.Tech) – Computer Science Engineering, Current: 2nd Year | 3rd Expected Graduation: May 2029 Semester, CGPA: 7.0 / 10

PROJECTS

Personal Portfolio Website | Technologies: HTML, CSS, JavaScript | Live: onkarpawar215.github.io/onkar-portfolio/

- Designed and developed a personal portfolio website to present education, technical skills, projects, and professional information.
- Created a structured and responsive web layout for desktop and mobile users.
- Implemented navigation and interactive website elements using HTML, CSS, and JavaScript.
- Deployed the website using GitHub Pages.
- Used the project to practice real-world front-end development and GitHub deployment.

Emergency Medicine Finder | Technologies: [Add technologies actually used] | Status: Academic/Project Development

- Worked on a solution concept focused on helping users locate required medicines during emergency situations.
- Designed the project around improving access to medicine information and availability.
- Focused on creating a practical technology-based solution for a real-world healthcare-related problem.
- Contributed to project planning, feature design, and solution development.

Pathology Detector | Technologies: [Add technologies actually used] | Status: Academic/Project Development

- Developed a project concept for detecting or identifying pathology-related conditions using technology.
- Focused on using computational methods to support faster identification and analysis.
- Worked on understanding the problem statement, designing the solution, and planning the technical implementation.
- Developed the project as a practical application of computer science concepts to healthcare.

TECHNICAL SKILLS

Programming Languages: C, C++, Python, JavaScript

Web Technologies: HTML5, CSS3, JavaScript

Core Computer Science: Object-Oriented Programming (OOP), Problem Solving

Development: Responsive Web Development, Basic Front-End Development

Tools & Platforms: Visual Studio Code, Git, GitHub

Soft Skills: Problem Solving, Teamwork, Communication, Adaptability, Time Management, Quick Learning

CERTIFICATIONS

[Certification Name] — [Platform/Organization]

[Certification Name] — [Platform/Organization]

[Certification Name] — [Platform/Organization]

RELEVANT COURSEWORK

Object-Oriented Programming; Data Structures and Algorithms; Computer Programming; Problem Solving in Computer Science; Computer Organization; Digital Logic Design; Fundamentals of Data Analytics

ACHIEVEMENTS

[Achievement]; [Achievement]; [Achievement]

HACKATHONS & COMPETITIONS

Smart India Hackathon (SIH) | Role: Team Member | Project: [Final project name] | Result: [Participated / Shortlisted / Finalist / Winner — only if applicable]

ADDITIONAL INFORMATION

Career Interests: Software Development, Web Development, Full-Stack Development, Problem Solving | Languages: [Add languages you are comfortable with]
